

# Dimension SwiftTest™

## for Oracle Fusion Cloud Applications

## Test automation for Oracle Fusion Cloud Applications

DWS can significantly reduce the time and effort associated with functional testing using Dimension SwiftTest™ for Cloud Apps. Savings of up to 60% can be realized during test execution, with further savings of 70% achievable during the creation and maintenance of test scripts.

**Dimension SwiftTest** for Cloud Apps has been designed with the non-technical end user in mind to make the creation, editing, scheduling and execution of testing as simple and efficient as possible. A dashboard provides a comprehensive view of all testing activity undertaken. Test managers and lead testers can view the progress, and results, at a project or scenario level. For more forensic analysis, users can drill down to the finite detail of individual tests.

### Key features include:

- Tests scripts are granular and comprise individually editable actions
- End-to-end processes can be tested by combining scripts
- Datastores allow tests to consume, or be driven by, fixed or variable data
- The client used to create scripts is application-aware
- Custom pages are supported
- Any project can be tested, including regular 90-day patching cycles
- The burden of testing is eased by automation

# Test your system, not your patience

Allows you to create granular tests and then, using **Test Queue** functionality, lets you combine these to test end-to-end processes.

Increases productivity through soft-coding and the use of **Datstores** to **intelligently and automatically** run tests

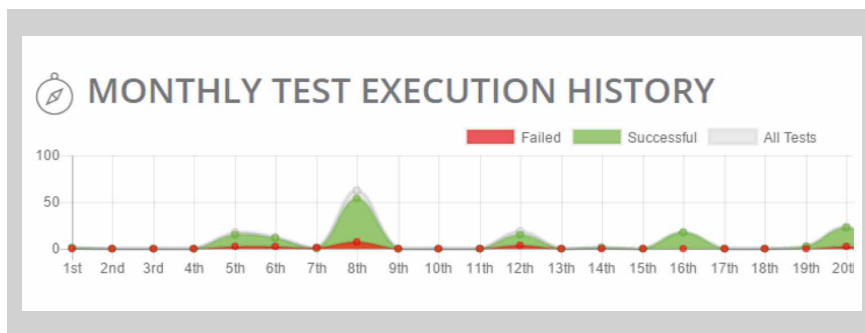

Enables **Business Analysts** and Super-Users to build and automatically execute test scripts.

**The Scheduler** enables users to submit test scripts in unattended mode.

**Native integration** with Oracle Cloud Applications; eliminates the need to know Java, C++ or HTML tags.

Uses **Repository and Dynamic Datstores** to handshake between tests; enabling you to test end-to-end business processes (e.g. "Procure to Pay") including batch jobs.

## Oracle Fusion Cloud Apps testing, made easy

**The Dashboard** aggregates and presents all test related statistics in a user friendly manner.
